

Rodrigo Centuri3n

Full Stack Developer

I am a Paraguayan with 9 years of experience in software development in general, and specifically 3 years in Full Stack Web with VueJS and Laravel(PHP).

I am currently the technical leader of a development team that I am in charge of, and I am a reference for requirements surveys with other areas. We use agile methodologies such as SCRUM and Kanban

For more than 2 years until today I have been working 100% remotely from home, initially due to covid but then the company observed that the performance in general increased and costs were reduced so we continue working from home

I would like to work remotely full time for a company in the USA as a Full Stack Web Developer.
